

Fire & Smoke Restoration Technician

2 Day Course

The Fire & Smoke Restoration Technician course concentrates on technical procedure for successfully completing the restoration of a fire and smoke damaged environment. Students will learn how to combine technical procedures with a practical approach to managing the job site and how that relates to pricing the job.

- General concepts and terminology
- Structural restoration and deodorization
- Contents cleaning and deodorization
- Pack-outs
- Adjuster relationships
- Pricing concerns
- Equipment and chemicals
- Soot residue
- Management and staffing needs
- Safety
- Understanding insurance policies
- Understanding fires and the damage they cause
- Cleanup
- Ultrasonic techniques
- HVAC cleaning
- Furniture refinishing

Today, many insurance adjusters are still mentally geared toward tear out and replacement rather than mitigation and restoration. Most property owners are not aware that these services exist, so learn how to market your services to the insurance industry. This will place you above your competition and put you into a win-win-win situation within your company, the insurance carrier and the property owner!

****Fee includes: Morning snack, lunch daily and the course manual**
