

Health & Safety Technician

This 2 day Health & Safety Technician course is a must for anyone performing restoration or mold remediation! This course is provided to increase safety in your workplace and reduce your company's risk of costly fines and penalties. It is also designed to put you ahead in the restoration industry to show insurance companies you and your staff is ahead of the competition regarding health and safety. Topics to be covered are: OSHA standards, Inspections, Citations and Penalties, Record keeping, Personal Protective Equipment (PPE), Hazard Communication, Hazardous Materials, Confined Spaces, and Blood-borne Pathogens

This class will assist you with:

- Understanding WHMIS (Workplace Hazardous Materials Information System)
- Verifying worker/employer/owner rights and responsibilities
- Identifying workplace hazards
- Identifying the hazard symbols
- Confined space entry
- Transportation of dangerous goods
- Do I need a Joint Health & Safety Committee?
- Functions and powers of JHSC
- Recommendations to assist your workplace
- Understanding and reading MSDS (Material Safety Data Sheets)
- Classes of Fire
- Respirator requirements, fit testing and training
- Bill C-45, purpose and understanding
- Knowing your energy and electrical hazards

Students get first-hand experience, through participation in class, on how health and safety directly affects them on a day to day basis. This class is open to technicians, employers, owners, insurance adjusters, agents, property managers, real estate agents and anyone who wants to know the law and how it affects their personal health and safety.
