

Water Damage Restoration Technician/Applied Structural Drying

Take both courses, Water Restoration and Applied Structural Drying, in 5 days instead of 6. Dry a structure in real-time in 5 days of school. Hands-on every day.

This **5 day combination** certification will certify students for both WRT and ASD designations; once they pass the required exams. In 5 days students will: perform extensive extraction, evaporation and dehumidification techniques, equipment set up, track drying progress, utilize drying charts, and evaluate psychrometric conditions. Throughout the 5 day course the attendees will progress through school with a real-life experience of actually doing the work necessary to complete a drying project.

What are the 5 biggest mistakes in restorative drying?

We promise to deliver understanding of:

- Accurate file document: Clear and professional
- Categories and classes of water
- How to incorporate the categories & classes of water
- FOUR principals of restorative drying
- How to document psychrometric reading so all parties understand
- Justification of equipment use and handling
- How to dry hardwood, paneling, and wood materials
- Substrate, and crawlspace drying
- Drying with positive and negative pressures
- S500, S520 Standard use and other applicable regulations to know and apply
- How to calculate equipment use, installation and setup
- Safety applications and technician PPE

Don't let old techniques stand in the way of becoming a true water loss professional. This class is packed with the latest information and features the most up to date equipment advancements in the industry.

****Fee includes: Morning snack, lunch daily and the course manual.**
