

CENTER FOR DISASTER RECOVERY

Health & Safety Technician

This **2-day** Health & Safety Technician course is a must for anyone performing emergency claims, insurance restoration, mold remediation and fire and smoke restoration.

This course is provided to increase safety awareness and expectation in your workplace and reduce your company's risk of costly fines and penalties.

This class will assist you with:

- The Global Harmonized System
- Understanding WHMIS (Workplace Hazardous Materials Information System)
- Job Hazard Analysis – application and use on a site
- Identifying workplace hazards
- Identifying the hazard symbols
- PPE – its use, selection and protection factors
- Scaffold and Ladder use
- Joint Health and Safety Committees and their functions
- Understanding and reading SDS's (Safety Data Sheets)
- Classes of Fire – safety on all types of losses
- Respirator requirements, fit testing and training

Through participation in class, students will learn how health and safety directly affects them and others on a day to day basis. This class is open to technicians, employers, owners, insurance adjusters, agents, property managers, real estate agents and anyone who wants to know the law and how it affects their personal health and safety.

****Course Fee includes: Morning snack, lunch daily and the course manual**
