

## WRT/ASD COMBO COURSE

Water Restoration Technician and Applied Structural Drying Combination Course

**Both Courses – Hands on - 5 days!**

Dry a structure in real-time in 5 days of school. Hands-on every day.

This **5-day hands on combination** certification will train students in both WRT and ASD subjects. In 5 days students will: perform extraction, evaporation and dehumidification techniques, equipment calculations, set up, track drying progress, utilize drying charts, and evaluate psychrometric conditions. Throughout the 5-day course the attendees will progress through school with a real-life experience of actually doing the work necessary to complete a drying project.

Learn about:

- Accurate file documentation: Clear and professional
- Categories and classes of water – their determination
- FOUR principals of restorative drying
- How to document psychrometric and structural readings so all parties understand
- Effective monitoring strategies
- Justification and calculations of equipment use and handling
- How to evaluate, set up and dry hardwood, paneling, and wood materials
- Substrate monitoring and crawlspace drying
- Drying with positive and negative pressure differentials
- What about the standard? Understand its use and how to apply it
- How to calculate equipment use, installation and setup

**Don't let old techniques stand in the way of becoming a true water loss professional. This class is packed with the latest information and features the most up to date equipment advancements in the industry.**

\*\*Course Fee includes: Morning snack, lunch daily and the course manual.
